

I am hearing impaired. I prefer to have certified interpreter on VRS to smooth communication between hearing and deaf I had experience with non certified interpreter who can't read me ASL. Not worth to struggle communicate and correct non certified interpreter I want to have smooth communicate effectively! That's professional business communication! Don't hire non certified interpreter period. Unless non certified interpreter go to school and training till her or his skills improve and take test and pass for certified. Thank you for your understanding.
